Cell phone: 331 256 03 31  
E-mail : [ricardo-ss@hotmail.com](mailto:ricardo-ss@hotmail.com)  
Age: 28 years  
Relationship status: Single

I'm a very proactive person who loves to learn, I'm always looking for challenges and how could I resolve hard problems. I'm very responsible, I like to get things done if I don't know something, I'm going to search everywhere a way of solving it. Also, I'm a fast learner and a very logical person.

**Qualifications:** Team work, leadership, responsible, formal about time and delivery dates, good at working under pressure, disciplined, empathic, proactive and good with words (good giving lectures or managing the crowds).

## Academic formation

### University

#### UNIVA

- Nutritionist (licensed)

#### TecMilenio

- Software development engineering (in course, 6<sup>th</sup> semester out of 8<sup>th</sup>)

## Skills:

- I manage Microsoft office (Word, Excel, Power Point)
- I can install and operate linux systems.
- Intermediate English
- Business administration
- Creating budgets, working and marketing plans.
- Creation and management of virtual machines (virtual box), web applications, android applications (android studio)
- Languages: Python, C#, HTML, CSS, Javascript, JQuery, Ajax, Angular.
- Creating and managing data bases (MySQL, SQL).

## Other studies

2018      Certification in VirtualBox (Udemy)  
2018      Certification of GNU/Linux (Udemy)  
2018      Course of Python (Udemy, in course)

## Experience

- TechBridge  
➤ February 2019 – Actual  
➤ C# Developer  
➤ Activities:  
➤ Creation of a web application, making calls to APIs, receiving and processing the information. Creation of modules, routing modules, components, modals, grids (with Ag-Grid). Managing Communications between components.
- Pudding Street  
➤ October 2019 – January 2020  
➤ C# Developer  
➤ Activities:  
➤ Freelance Project. Development of a web application, with an architecture MVVM using angular, HTML and CSS for the frontend, and for the backend a restful API made with .net core 2.1 in visual studio, and MySQL for the database. I was in charge of the planning, analysis, design, and coding of the app. Deciding which architecture would be better, designing the structure of the app, developing both front and backend, and testing it. Development of the UI.
- Herbalife  
➤ Mayo 2019 – February 2020  
➤ C# Developer  
➤ Activities:  
➤ .NET developer, working on prod support, enhancements and unit testing of the current apps. Creation and consumption of APIs. Creation of new classes and methods for new implementations or features. Help with the SRE certification, developing an editor config to assure coding conventions, making unit testing, and developing a logging system for the application. Creation of interfaces to ensure the implementation of the classes and to facilitate the unit testing.

- NeverEnding Games
- January 2019 – June 2019
- C# Developer
- Activities:
  - C# developer of the games, all the logic, and physics of the game. Creating animations and interfaces. Implementing new classes and methods, coroutines, delegates, and events to check changes in the game and trigger something according to that.
  
- Quianity
- March 2017- January 2019
- .NET Developer FullStack
- Activities:
  - FullStack developer of web applications (in visual studio), working with the architecture MVC, using HTML, CSS, JavaScript, JQuery, and Ajax for the frontend, C# for the backend and Mysql for the database. Being part of the whole life cycle of the apps (Planning, analysis, design, coding, implementation, testing). Creation of view and partial view to display the data to the client and optimize performance. ADO.NET an entity framework to manage the database. Design and Implementation of the UI.

I hereby declare that all the information above is accurate and I'm in your disposition for any further doubts or questioning:
